

DATA SCIENCE

WHAT IS IT?

Data Science uses a process in which multiple data analysis skills are used to solve a unique problem. Multiple skills are used in this profession to help research and answer problems.

DATA SCIENCE

SKILLS

Data Science has a lot of areas to specialize in, which means that there are a lot of skills to learn such as:

- Programming
- Machine learning
- Mathematics
- Deep learning
- Algorithms
- Statistics

And more!

ROLES

There are many roles in Data Science such as:

- Data Analyst
- Data engineer
- Data scientist

And more specific roles!
